

# Project Euler #11: Largest product in a grid

This problem is a programming version of [Problem 11](#) from [projecteuler.net](#)

In the  $20 \times 20$  grid below, four numbers along a diagonal line have been marked in bold.

The product of these numbers is  $26 \times 63 \times 78 \times 14 = 1788696$ .

What is the greatest product of four adjacent numbers in the same direction (up, down, left, right, or diagonally) in the  $20 \times 20$  grid?

## Input Format

Input consists of **20** lines each containing **20** integers.

## Constraints

- $0 \leq \text{Each integer in the grid} \leq 100$

## Output Format

Print the required answer.
